SIZES OF GASTRONORM PANS

Gastronom (GN) originated in the 1960s, now it has become a basic kitchenware in the international catering industry. Its benchmark specification is 1/1 size with length 530mm x width 325mm, other gastronorm sizes are multiples and submultiples of this basic module size and often shown in terms of fraction. For example, size of a GN 1/2 container (325 x 265mm) is half of a GN 1/1 container.

WHY CHOOSE 304?

	304 Stainless Steel	201 Stainless Steel
Chromium	Chromium can enhance the corrosion and rust resistance of steel. More expensive.	
Nickel	Nickel can enhance the corrosion and rust resistance of steel. More expensive.	
Manganese	Manganese can increase strength, toughness and hardenability of steel. Lower cost.
